

Public and legal pages

Purpose

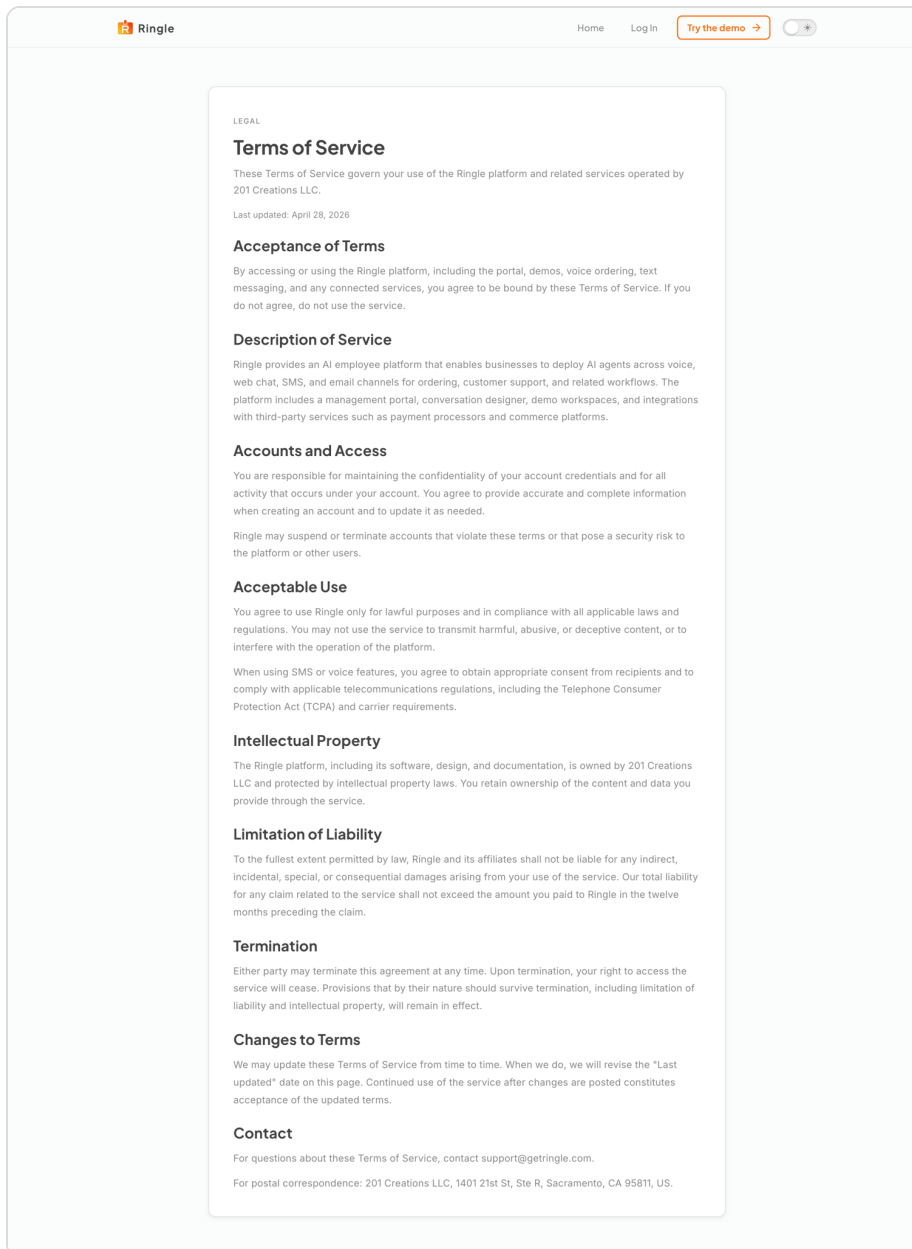

Find the portal's legal documents (terms of service, privacy policy, cookie policy), see where the footer's marketing links lead, and recognize the not-found page.

Prerequisites

- A web browser. These pages are public and need no account.

Steps

1 Step 1

⚡ Action: Go to <https://portal.getringle.com/terms>, or click Terms of Service in the footer of any public portal page.

✅ What you should see: The Terms of Service page loads with its last-updated date and sections covering acceptance, description of the service, accounts, acceptable use, intellectual property, liability, termination, changes, and contact details.

2 Step 2

Ringle Home Log In [Try the demo →](#)

PRIVACY

Privacy Policy

This Privacy Policy explains how Ringle handles account, business, and ordering data when you use the portal, demos, and connected services.

Last updated: April 28, 2026

What We Collect

Ringle stores the account details you provide when you create a portal account, such as your name, email address, phone number, business details, and settings you choose inside the product.

When you use the customer demo or live ordering features, we may process conversation content, order details, language preferences, and integration metadata needed to operate voice and text ordering workflows.

How We Use Information

We use your information to authenticate users, configure your workspace, deliver voice and text ordering experiences, support integrations such as Square or Shopify, and improve product reliability.

We also use limited operational telemetry to troubleshoot issues, prevent abuse, and measure product health. We do not sell your personal information.

How We Share Information

We share data only with service providers or integration partners that are necessary to deliver the product, such as infrastructure, communications, payment, and commerce platforms you explicitly connect.

We may also disclose information when required by law, to enforce our terms, or to protect the security of customers, businesses, or the platform.

Security and Retention

We use administrative, technical, and organizational safeguards designed to protect account data and ordering activity. No system can promise absolute security, but we work to limit access and retain data only as long as it is needed for the service or legal obligations.

Your Choices

You can review and update account information inside the portal, request changes to business data, and contact us if you need help with access, deletion, or data handling questions.

For privacy questions related to the portal or customer ordering data, contact support@getringle.com.

For postal correspondence: 201 Creations LLC, 1401 21st St, Ste R, Sacramento, CA 95811, US.

Ringle
Ringle is a voice and text ordering platform that connects to your POS and storefront — whether that's Square, Shopify, or your own system — so customers can place orders by phone while you manage everything from one place.

⚡ **Action:** Go to <https://portal.getringle.com/privacy>, or click Privacy Policy in the footer.

✅ **What you should see:** The Privacy Policy page loads. It explains what data Ringle collects, how it is used and shared, security and retention practices, and your choices, with a support contact for privacy questions.

COOKIES

Cookie Policy

This Cookie Policy explains how Ringle uses cookies, local storage, and related technologies across the portal and demo experiences.

Last updated: March 9, 2026

Why We Use Cookies

Ringle uses cookies and similar browser storage to keep you signed in, remember product preferences, maintain secure sessions, and support essential portal functionality.

We may also use analytics-related storage to understand usage patterns, diagnose failures, and improve the ordering experience over time.

Types of Cookies

Essential cookies help the portal authenticate users, remember the active workspace, and keep core screens working correctly.

Preference cookies store choices such as interface settings or language. Analytics cookies help us measure adoption and performance. Integration providers may set their own cookies when you connect third-party services.

Managing Cookies

You can control cookies through your browser settings, including deleting existing cookies or blocking future storage. Some portal features may stop working correctly if essential cookies or local storage are disabled.

Contact

If you have questions about how Ringle uses cookies or browser storage, contact support@getringle.com.

⚡ **Action:** Go to <https://portal.getringle.com/cookies>, or click Cookie Policy in the footer.

✅ **What you should see:** The Cookie Policy page loads and describes why the portal uses cookies and browser storage, the types in use (essential, preference, analytics, integration), and how to manage them in your browser.

4

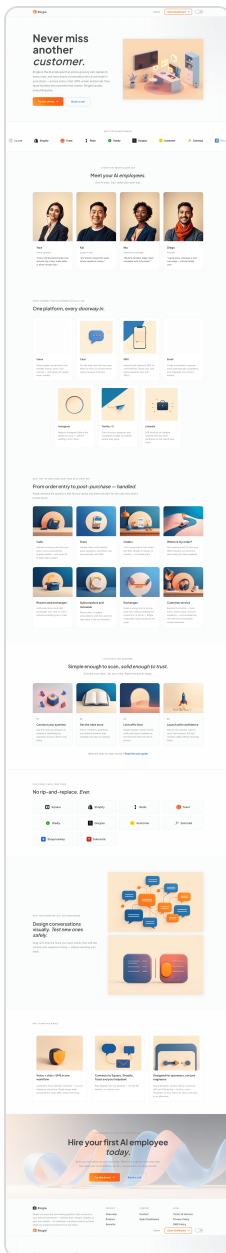

Step 4

⚡ **Action:** Visit an address that does not exist, for example <https://portal.getringle.com/this-page-does-not-exist>.

✓ **What you should see:** The portal shows its not-found page: a large 404, the message "The page you're looking for doesn't exist.", and a Go Home button that returns you to the landing page (or your dashboard when signed in).

5 Step 5

⚡ Action: Click Product, Security, Pricing, or Contact in the portal footer.

✓ What you should see: The browser leaves the portal and opens the matching page on the Ringle marketing site at www.getringle.com. The screenshot shows the Product page after following the footer's Product link. Use the browser back button, or the Open Dashboard link in the marketing header, to return to the portal.

Troubleshooting

- The legal pages show different last-updated dates: that is expected; each document is revised on its own schedule.
- A footer link opened a different website: the Product, Security, Pricing, and Contact links intentionally go to the marketing site; only the three legal links stay on the portal.
- You hit the 404 page on an address you expect to work: check the spelling of the address, and sign in first if the page is part of the portal application rather than the public site.

Notes

- Routes: `/terms` , `/privacy` , `/cookies` , plus the catch-all not-found page for unrecognized addresses.
- Source components: `pages/legal/*` in the portal app.
- The footer's Product (`/product`), Security (`/security`), Pricing (`/pricing`), and Contact (`/contact`) links redirect to the corresponding pages on the marketing site.
- The legal pages are reachable while signed in or signed out; the header changes with your session state but the content is the same.
